SPECIALISTS

“Top performance even
under pressure.”

Norbert, 42, foreman

IN WORLDWIDE USE

As an effective partner in the print and paper industry, Optibelt has the ideal drive solution to meet even the most demanding requirements. This means that every processing step – from cutting and folding through to material transport – runs smoothly and with absolute precision. Additional factors that find approval with customers and users alike include exemplary efficiency and minimised maintenance costs. This is why Optibelt's sustainable premium products can be found in use around the globe.

FOR PULP & PAPER

OPTIBELT SUCCESS STORY

LOWER COSTS THANKS TO optibelt **RED POWER**

Bio-Pappel is the leading manufacturer and producer of sustainable packaging, newsprint and fine papers in Mexico and Latin America. Previously, the vacuum pumps used in the company's paper mills had caused ongoing problems due to the standard belts wearing out after eight to ten months. This led Bio-Pappel to switch to **optibelt RED POWER** maintenance-free, high performance wedge belts, which delivered a service life of at least 24 months. As a result of this switch, the company now makes an annual saving of around 6,000 US dollars.

OPTIBELT SUCCESS STORY

PERFECT SERVICE FROM OPTIBELT

The Canadian company Domtar specialises in the production of pulp and paper and had been plagued by problems with a powerful grinding mill used for grinding waste wood. The belts, made by another manufacturer, were slipping and causing damage to the bearings of the mill on a regular basis. Optibelt designed a completely new drive solution for Domtar, using four high performance **optibelt BLUE POWER** kraftbands, and set up the system with high precision using the **optibelt TT OPTICAL** frequency tension tester. The mill now runs smoothly with no breakdowns.

FAST & PRECISE

It's not just the result that counts.

1. PULPER (PULP PRODUCTION)

Pulp and waste paper are mixed with water and broken down into separate fibres.

3. PRESS

Water is then carefully removed from the wet paper web.

5. SMOOTHING

Steel rollers smooth the paper ready for further processing.

2. SHEET FORMATION

The fibres become matted into a paper web on a vibrating screen.

4. DRYING

Heated hollow cylinders dry the paper.

6. FINISHING

The properties of the paper are chemically tuned.

In the printing and paper industry there are many different and sophisticated manufacturing and finishing processes, which all impose exacting demands on the machinery. Precision, durability, reliability and optimal power transmission are decisive criteria that the relevant drive systems are expected to meet throughout the entire production chain. Optibelt's high performance belts provide sustainable solutions to these challenges.

7. WINDING ONTO ROLLS

The paper web is wound onto a tambour in various widths.

9. OFFSET PRINTING

Requires reliable machinery that runs particularly smoothly.

10. WINDING MACHINE

The drive and mechanical equipment is subjected to enormous tensile forces.

8. REEL STAND

A powerful drive system ensures a quick and flexible output.

11. PLOTTER

A precise control mechanism ensures excellent results.

12. DIGITAL PRINTING

Precise paper feed at high speeds is imperative.

optibelt **OMEGA HP**

HIGH PERFORMANCE TIMING BELTS

TIMING BELT PULLEYS

optibelt OMEGA
timing belts run in
standard HTD and RPP pulleys

DIMENSIONS

2M HP	74–1224 mm
3M HP	111–1569 mm
5M HP	180–2525 mm
8M HP	288–3600 mm
14M HP	966–4578 mm

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- glass cord
- high performance timing belt for extremely large loads at high rotational speeds
- shear-resistant fabric with minimised wear and friction
- up to 2 times the power transmission capability of the **optibelt OMEGA** standard version

optibelt **RED POWER 3 S=C Plus**

HIGH PERFORMANCE WEDGE BELTS

V-GROOVED PULLEYS

all standard pulleys,
special pulleys on request

DIMENSIONS

SPZ	1202–3550 mm
SPA	1207–4000 mm
SPB	1250–8000 mm
SPC	2000–10000 mm
3V/9N	47.5–140 inches

Other profiles + dimensions on request

maintenance-
free

ADVANTAGES AND CHARACTERISTICS

- maintenance-free polyester cord
- core with transverse fibres
- suitable for back-bend idlers
- up to 50 % higher performance than **optibelt SK**, making it possible to use smaller drives

optibelt **SK S=C Plus**

HIGH PERFORMANCE WEDGE BELTS

V-GROOVED PULLEYS

all standard pulleys,
special pulleys on request

DIMENSIONS

SPZ	487–3550 mm
SPA	732–4500 mm
SPB	1250–8000 mm
SPC	2000–12500 mm
3V/9N	25–140 inches

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- polyester cord
- specially developed with general machine construction in mind
- transmits more power than the classic V-belts with comparable top width

optibelt **RB**

RIBBED BELTS

RIBBED BELT PULLEYS

standard range,
special pulleys on request

DIMENSIONS

PK	630–2845 mm
PL	954–6096 mm

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- polyester cord
- high belt speeds are possible
- suitable for back-bend idlers
- PK, PL profiles also available with aramid cord
- DPK profile available

optibelt DELTA CHAIN Carbon

HIGH PERFORMANCE TIMING BELTS

TIMING BELT PULLEYS DC
all standard pulleys,
special pulleys on request

DIMENSIONS

8MDC 640–1792 mm

Runs in **optibelt ZRS DC** timing belt pulleys and comparable competitive pulleys with CTD and PC profiles.

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- one of the strongest timing belts on the market
- carbon cord
- alternative for chains and gear transmissions
- excellent resistance to oil and chemicals

optibelt OMEGA

TIMING BELTS

TIMING BELT PULLEYS
optibelt OMEGA
timing belts run in
standard HTD and RPP pulleys

DIMENSIONS

2M 74–1224 mm
3M 111–1863 mm
5M 120–2525 mm
8M 288–4400 mm
14M 966–4578 mm

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- rubber timing belt with **optibelt OMEGA** profile
- glass cord
- low noise
- efficiency of up to 98 %
- suitable for power transmission with slow and fast running drive systems with no high impact loading

optibelt OMEGA HL

HIGH PERFORMANCE TIMING BELTS

TIMING BELT PULLEYS
optibelt OMEGA
timing belts run in
standard HTD and RPP pulleys

DIMENSIONS

8M HL 288–3600 mm
14M HL 966–4578 mm

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- reinforced glass cord
- optimised absorption of shock loading
- highly resistant to dynamic loading
- very low elongation
- up to 15 % more power than **optibelt OMEGA HP**

optibelt OMEGA double-sided

TIMING BELTS

TIMING BELT PULLEYS
optibelt OMEGA
timing belts run in
standard HTD and RPP pulleys

DIMENSIONS

D8M 1120–3600 mm

Other profiles + dimensions on request

ADVANTAGES AND CHARACTERISTICS

- timing belt with **optibelt OMEGA** profile
- glass cord
- low noise
- efficiency of up to 98 %
- suitable for power transmission with slow and fast running drive systems with no high impact loading

THE OPTIBELT TEAM FOR DEVELOPMENT, APPLICATIONS AND SERVICE

SOFTWARE TOOLS AND SPECIALIST CONSULTING

Optibelt's free CAP software allows users to calculate their specific drives quickly and easily. For more complex drive systems, CAP Professional gives users the ability to perform detailed variable calculations. CAP's efficiency calculator will also compare available drives with those already optimised.

Optibelt application engineers are always available to provide advice to customers' operations around the world. They can assist in optimising the drives for entire plant operations.

SERVICE SUPPORT

To make sure that all machines run reliably, Optibelt also offers personal support in drive assembly, maintenance and service on site around the world. Optibelt's broad range of measuring devices and service tools allow easy drive optimisation, maintenance and repair.

OPTIBELT CUSTOM PRODUCTS

Optibelt offers custom high performance products for all applications: Customised products are designed to precisely meet customers' drive application requirements. Optibelt engineers develop tailored drive solutions for superior efficiency and safety.
